Joined FRC in 2000
Division Chief

John Lee, MD, FAAP
Joined FRC in 2006

Ian Mills, MD, FAAP
Joined FRC in 2018

What is a Pediatric Radiologist?

Our board-certified Pediatric Radiologists are experts in the diagnosis of illnesses, injuries, and diseases of infants, children, and adolescents. Using imaging techniques and state-of-the-art equipment, they are specially trained to understand the unique needs of children, parents, and pediatricians in the diagnostic process. Our Pediatric Radiologists are an integral part of the diagnostic team that work to provide the absolute best possible care in a way that is both comfortable and comforting.

Who needs a Pediatric Radiologist?

Any child who requires medical imaging should see a Pediatric Radiologist because they fully understand childhood disorders and the special needs of children. Using a wide spectrum of diagnostic studies, including X-ray, ultrasound, computed tomography (CT) and magnetic resonance imaging (MRI), Pediatric Radiologists ensure that testing is performed properly, safely and gently, and they interpret the results of the tests to make an appropriate diagnosis.

What does “FAAP” stand for?

The designation FAAP indicates that a physician is Fellow of the American Academy of Pediatrics. It is a privilege offered to a select group who are uniquely qualified to provide medical care for children. Each of our Pediatric Radiologists has achieved the honor of Specialty Fellow of the Academy and are committed to the care and advocacy of infants, children and adolescents. When you provide your patients an order for pediatric imaging, rest assured they receive excellent care from our team.

How do I reach a Radiologist?

Pediatric Reading Room — 703.776.3262

For Subspecialty Exam Questions:

| | |
|---|---------------------|
| Neuro CT and MR: | 571.472.3207 |
